Thank you for meticulously going through our MS. Adding discussion on climate implications of the results is good suggestion. Some part of it is mentioned in our overview paper [Wood et al., The VAMOS Ocean-Cloud-Atmosphere-Land Study Regional Experiment (VOCALS-REx): goals, platforms, and field operations, doi:10.5194/acpd-10-20769-2010]. Also we are working to compile all the multiplatform observations from VOCALS field campaign to assess the climatic impacts and write separate paper(s).
