

Interactive comment on “A combined particle trap/HTDMA hygroscopicity study of mixed inorganic/organic aerosol particles” by A. A. Zardini et al.

A. Laaksonen

ari.laaksonen@uku.fi

Received and published: 14 April 2008

I would like to note the authors that citric acid hygroscopic growth has also been measured and discussed by Joutsensaari et al. (ACP 1, 51-60, 2001).
