Received and published: 14 April 2009

Dear Andrea,

After reviewing your response to the comments, I believe that you did not satisfactorily address the concerns with your manuscript. In particular, your manuscript is simply a model description and comparison to observations. Therefore, I reject your manuscript for publication in ACP as I believe that you cannot address these concerns in a short period of time. However, I do encourage you to continue your research, identifying a scientific topic to address.

Sincerely,

S1447
