Interactive comment on “VOCALS-CUpEx: the Chilean Upwelling Experiment” by R. D. Garreaud et al.

Anonymous Referee #1

Received and published: 21 December 2010

Overall this is a nice summary of the datasets and issues for the CUpEx work. The paper gives a nice overview with enough detail to highlight what needs more investigation in other work.

Specific Comments

Pg 26439 line 21 – wind-energy potential should be wind-energy potentials
Pg 26440 line 2 Angamos on the northern . . .
Pg 26440 lines 1-2 – need to note that these locations are shown in Fig. 3a
Pg 26440 lines 10-11 – should reference that Fig 3a is Quickscat wind composite
Pg 26440 – line 21 replace limitations by land mask with limitations that result from land mask
Pg 26441 line 2 AMBL should be spelled out on first use
Pg 26441 line 5 - insert space after downwelling
Pg 26445 line 12 – understanding not understating
Pg 26446 lines 18-22 should mention how vertical motion was derived for these cases
Pg 26447 line 9 recovery not recover
Pg 26447 lines 14-16 explain that these are the blue vectors on the plot and where they were derived from
Pg 26450 lines 1-2 might note that this is a point for further study as well
Pg 26454 line 12 it is 2007 Monthly Weather Review pgs 60-81
Pg 26469 Fig 12 caption note what sources the different datasets were to derive the blue arrows
