Received and published: 1 May 2012

This paper investigated the spatial distribution of Hg0 in ambient air in Wanshan Hg mining area to identify the major sources of atmospheric mercury. I have no oppositions to the publication of this paper, but ask the authors to consider the following comments.

Comments: 1. Chemical symbol Hg was referred throughout the paper, you should define it at the beginning of the paper. Page 5740 line 3: change ‘Hg’ to ‘mercury (Hg)’. 2. Page 5742 line 19: change ‘state’ to ‘states’. 3. Page 5743 line 25: change ‘occurred’ to ‘occur’. 4. Page 5744 line 2: delete the word ‘concentrations’. 5. Page 5744 line 26: There is a missing space between ‘bottle’ and ‘were’. 6. Page 5746 line 12: change ‘transform’ to ‘transformed’. 7. Page 5746 line 22: If I am not mistaken there is an omission, and ‘wash-off’ should be changed to ‘washing-off’. 8. Page 5748
