Figure S1 (a-f). Hourly spatial variations of SO₂ and surface wind directions measured in Taipei city on 8 July 2012. Square dot: TARO.
Figure S2 (a-f). Hourly spatial variations of SO₂ and surface wind directions measured in Taipei city on 27 July 2012. Square dot: TARO.
Figure S3. Time series of measured parameters for identified NPF event days. From bottom to upper panels are: i) Particle size distribution, ii) \( N_{\text{mac}} \) and \( N_{\text{Aitken}} \) iii) NUF, iv) ambient temperature and RH, v) wind direction and speed.
